

### WHO WE ARE:

StreemU rents tailored streaming & playback solutions to the TVC & Film Industry. We have four units (4) for hire and these are designed, built & supported locally by our team of Film Professionals & IT/Networking Specialists.

### WHAT WE DO:

StreemU makes complex AV problems easy by offering a plug & play, low latency & secure video platform to:

- Stream direct from your film set to remote stakeholders
- Stream to on-set based personnel (sound, hair, make up, wardrobe) on their devices to reduce the number of hired screens & crew members crowding around monitors (Covid Safe)
- Provide non-Video Assist specialists with the tools to easily stream, record clips, playback & capture Directors commentary for post-production.

### YOU CAN EASILY:

- Capture / Record up to 4x Cameras using SDI input (cable or receiver) in any format up to 1080p i.e. PAL, NTSC
- Stream / Playback with sound to any device (iOS, Android, Mac, Windows, Linux) over the Web or WiFi to up to 25 viewers each (50 in total)
- Have those WiFi viewers up to 100 lineal metres away (pending Line of Sight) & 10-20 lineal metres through obstructions such as walls, cars, trees, etc
- Stream / Playback 1 feed or split screen with 2 or 4 feeds simultaneously up to 1080p 25fps, to any viewer / device
- Sync sound input *either* from your Sound Recordist (analogue, 3.5mm) or over SDI (Camera)
- Log scene/take names & numbers as you record
- Add a Director's/Script Supervisor's commentary to each take
- Create a Select list of clips and/or rate clips with a star rating
- Export the list of Select clips to PDF with captured notes for use by post-production
- Use our SDI out (cable or transmitter) to the Director's monitor for playback
- Skip, fast forward, rewind, pause & playback clips at slower or faster speeds
- Ask StreemU to:
  - supply a silent battery solution with up to 12+hrs continuous operation for sets without 240v power (additional fees *may* apply)
  - supply additional items such as 17" Small HD Directors Monitor, extra iPads & investigate what options are available for low bandwidth areas (additional fees *may* apply)
  - be flexible with regards to delivery / pick up options & additional viewers (additional fees *may* apply)
